

### Letter Of Recommendation

I am writing this letter of recommendation in support of Ms. Naina Desai who is acquainted with me in my position of Assistant Professor and has been under my tutelage for the subjects of Basic Electronics, Network Analysis, Microwave and Antenna. Based on my observations, I found her an approachable person with strong technical skills and astounding analytical abilities.

She was detail-oriented, took interest in understanding precise requirements of the allocated work, and consistently met the expectations by delivering desired output. The time management she exhibited while working on a task was inspiring and often served as an impetus for her colleagues to bring in efficiency in their performance. She submitted all her assignments well within the deadline without making any compromise on the quality of work, a rare trait that further attests to her commitment to excellence. Interacting with others individually or in a group activity, she was polite in her conduct politely and collaborated well as a team member. Despite her hectic involvement in multiple academic activities, she always had time to help her peers and due to her empathetic nature was held in high regard by her colleagues and juniors alike. Furthermore, she came across as an inspirational leader, displayed the qualities needed to handle a team in adverse circumstances, and I especially liked her ability to overcome obstacles without giving in to the pressure.

Naina was under my guidance on her final year project titled, "Object Tracking Using RFID in Three Dimension Space", which utilized RFID Technology to accurately track an object in a particular environment or space with minimum human efforts. In this group project, she contributed significantly with her accurate analysis and also presented it at the National Conference of Science, Engineering and Management. During the presentation, she spoke eloquently about the findings and it was striking how she confidently responded to all the questions from the technical panel. As a student, she was extremely particular about achieving holistic personality development, participated in various extra-curricular activities, and was also involved in organizing a state-level inter-college technical festival "IGNUS 2K19". Additionally, she has an affinity for socially relevant causes, believes in giving back to society, and currently is heading a startup aimed at training and assisting students (especially female students and those hailing from rural areas) with job placements.

I believe this course will help Naina in acquiring in-depth knowledge and a unique blend of engineering and management offered through the curriculum would prepare her well for the future opportunities in the field of her interest including entrepreneurship. Hence, I affirm my recommendation for her.
