

Letter Of Recommendation

This letter is being written with the intent to support Ms. Ishika Patel's application for the master's program at your university. She is acquainted with since (first/second/third/fourth) year of her engineering program at ABC University and was under my tutelage for the subjects of Linear Integrated Circuits and Neural Networks. Through our academic interactions over all these years, I found her to be an attentive participant during lectures, someone who is completely involved in the various group discussions and class activities.

She possesses the curiosity needed to obtain significant knowledge for fulfilling her desire to be an academically brilliant student; consistently achieved her goal by scoring top marks and focuses on understanding the fundamentals. Her passion for the subject of Neural Networks is unparalleled and can be assessed from the fact that despite it being an elective option, she chose it as the main subject and was quick in forming a group of like-minded students for conducting subsequent researches to better understand the concepts involved. She is regular in attending lectures on time, has never missed any lecture throughout the course, pays attention to the concepts being discussed in the class and confidently put across her queries. Furthermore, her willingness to improve is particularly impressive as she is always truthful about mistakes committed and strives to get clarity if she is not able to comprehend any topic.

Apart from her stellar academic record, she catches attention with her active participation in various co-curricular and extra-curricular activities as well and has completed many additional courses and projects from online platforms (guided project in Neural Networks and Deep Learning from Coursera). She also takes interest in dancing and is part of college dance troupe. Keeping up with her commitment for achieving holistic growth, she has also attended many events and under my guidance participated in a two-day workshop on Python organized by Swecha. In this workshop, her involvement was full of zeal, yet she meticulously worked on all the assignments and completed them well within the deadline. As her mentor, I was pleased to witness her sound research skills and admire her taking initiative to take added responsibility whenever needed.

Having known Ishika, I can attest that she has qualities considered to be vital as far as the field of (stream) is concerned and feel that she would gain more relevant skills through this course to be an expert-level professional in the area of her interest. I therefore strongly recommend her.

Dr. Raghav Agarwal
HOD, ECE Department
ABC University
