

### **Letter Of Recommendation**

I am writing to recommend Ms. Tanvi Gupta as she intends to attend (University name) for pursuing (course name). I have taught her the subjects of Antennas and Wave Propagation and Digital Signal Processing and recognize her as an excellent team player who possesses sound communication skills and has a keen interest in academics.

She is a highly motivated person, works sincerely on all her projects and her determination in performing consistently at a high level serves as an inspiration for others too. In lectures, she is involved in constructive discussions to resolve her doubts and the interesting queries she raises clearly attest of her being extremely attentive in the class. She, is at her best while coordinating in a group, and consciously makes proactive efforts at deriving the best results possible through collective team work. In crucial time, she adapts well to the situation and utilizing her vast knowledge always manages to come up with apt response to handle it appropriately. With her positive intent of working towards resolving the issues faced, she is the go to person for devising pragmatic solutions to complex problems and so far has always met expectations.

I have also instructed her in the practical sessions for the subject of Digital Signal Processing and mentored her on a project titled, "Analyze Website Visitors with Google Analytics Segments". In the laboratory sessions, she looked to implement theoretical knowledge rationally in live experiment and her overall lab work was comprehensive. During the project work, she strived to understand the requirements in detail; did not mind exploring concepts beyond the prescribed syllabus of the coursework to complete assigned tasks and remained composed when faced with a hurdle or constraint. The discipline regime with which she approached all her responsibilities was incredible and I feel it was her ability to follow instructions diligently that led to her grasping the novel concepts with ease. Consequently, she was quick in learning, whether it was acquiring a new skill or improvising to apply a learnt principle better and the accountability with which she conducted herself is a rare attribute one can expect from a participant at student level.

In my opinion, this course will allow Tanvi to develop in-depth domain knowledge and facilitate her gaining essential skills that are needed for an enriching career. It would further contribute to her growth as a professional and surely help her realize her goals. Hence I affirm my recommendation for her.
