

Letter Of Recommendation

I am pleased to support Mr. Virat Sharma's application to pursue a Master's Degree at your university. I have known him since (mention year) and instructed him in the subject of Operation Research. Based on my observation of him through all these years, I can attest that he was a dedicated student with the requisite attitude and willingness to learn.

He was keen on learning new concepts and complementing his enthusiasm for gaining correct conceptual understanding, did not mind sharing his doubts during lectures. His relevant and precise queries further revealed his intent of gaining deep domain expertise, clarity of thoughts, and the innovative mind he possesses. He was confident while interacting with others or giving project presentations and seemed capable of expressing his views clearly in front of any audience, whether it was his colleagues or expert panel. When participating in group activities, I have observed him to be a perfect team person who is willing to listen to others and can put across his opinions too at the same time with ease.

Under my guidance, he has completed a project related to the Genetic Algorithm using C++ Language, wherein, he significantly stood out in terms of his perseverance and showed flexibility to attempt multiple approaches. As his faculty, I think he was a step ahead of most of his peers when it came to experimenting with his learning and due to his creative abilities was able to view things from different perspectives. Furthermore, he was extremely serious about his work, paid attention to instructions given; followed them diligently and was able to meet all the associated expectations.

Virat was focused on developing a well-rounded personality and his determination in achieving this goal was evident from his brilliant performance in extra-curricular activities. Throughout the coursework, he participated in various events, and in as the member of cultural committee was involved in arranging the events too. With his strong organizational skills, he juggled various academics and non-academic commitments with ease and managed multiple responsibilities timely. It was amazing to witness the consistency he achieved in terms of attention and regular participation in diverse activities and at the same time ensured that his studies are not getting impacted.

On strength of his talent and desire to learn, I believe he is ready to pursue this master course, have confidence in his capabilities, and am pretty sure that he will successfully learn all the skills taught within the structure of this course. Hence, I affirm my recommendation for him.
