

### Letter Of Recommendation

It is a proud moment for me to write this letter of recommendation for my student Kavya Mehta and I am delighted to support her application for a Master's program at your university. I have known her since the first year of her engineering program and instructed her in the subjects of Basic Electronics, Signals and Systems, and Control Systems. Based on my observation, I can say that she was an assiduous student who was always willing to learn and can grasp quickly.

She was very inquisitive about technology and never hesitated to explore beyond the academic curriculum to know how the real world is evolving in light of new technologies. In addition to her quest for acquiring knowledge, her dedicated efforts were admirable as she was ready to work sincerely until she achieved her goal. An academically brilliant performer with a stellar record, she was humble in her conduct and fervently participated in various activities and group discussions. During these activities, she often volunteered for presenting the topic to the class and impressed everyone including me with her sound acumen, convincing presentation style, and concise yet effective explanation of the topic she was speaking on. Being an excellent communicator, she was considerate of others' perspectives, and listening actively would contribute towards making the conversations intellectually enriching. Due to her strong interpersonal skills, she was able to maintain cordial relationships and in many instances showed the vital trait of being a team person who works cohesively with his colleagues.

Under my guidance, she has completed her final year project and written a technical paper on Blood Sugar Monitoring using Boronic acid – A spectroscopic approach, which was subsequently presented at the International Conference on Recent Innovations in Science, Engineering and Management. I have also mentored her in practical sessions, wherein I was impressed with her comprehensive work, and even more pleasing was how she would complete her assigned tasks well within the deadline without making any compromise on the quality. As a student she gave equal importance to overall personality development, consciously takes out time for extra-curricular activities and some of her notable initiatives in this regard included an industrial visit to Philips innovation campus and participation in IEEE EMBS and IEEE women.

In brief, Kavya is a highly motivated student with a background that prepares her well for the challenges of pursuing higher studies. I see no reason that she will be anything other than an excellent addition to your institute, and I thus recommend her without reservation.

Dr. Pranav Patel  
Associate Professor,  
ABC University
