

Letter Of Recommendation

I am writing this letter of recommendation for Mr. Vihaan Kapoor, a (your stream name) undergraduate student at ABC University. I have instructed him in the subjects of Computer Networks and Analysis and Design of Algorithms and as his professor would say that he is an excellent team player and an inquisitive learner who is keen on expanding his technical knowledge pertaining to cyber security.

He is an optimistic individual with ability to inspire people through his positive thought process and at all times exhibits professionalism during his interactions with others. He collaborates well with the team members in group activity and displays his analytical skills while working on assignments. His understanding of the technical concepts is exceptional and amazes with his accurate analysis of the requirements before proceeding with the actual work. Furthermore, he often takes up additional responsibility and did not mind leading a team whenever needed. As a leader, he is approachable, willingly shares his knowledge and amazes with his strong interpersonal abilities through which he facilitates the assigned work and ensures participation from everyone.

Throughout the course, he has been vocal regarding his future goals, has regularly shared them with me during our discussions and seems quite confident of realizing his ambitions. Having mentored him as freshmen, I noticed him to be an active listener, attentive to the insights shared and someone always up for proactively gaining knowledge on all the aspects of the subject being discussed. Due to his sanguine approach, he constructively takes feedback from others, has been honest about all issues that he tumbled upon while executing and promptly seeks advice to take corrective measures. Accentuating his versatile personality further is his participation in various co-curricular as he has completed many online courses from Udemy and Coursera and is equally good at extra-curricular activities. His diverse interest in non-academic activities ranges from art oriented photography to outdoor sports such as football, swimming and actively following his passion for swimming he has also represented the college at state level.

I believe this course will assist Vihaan in acquiring significant knowledge and provide learning experience in advance level technological development related to the field of (mention stream). With his sound technical skills and creative thought process, he is bound to be successful in this course and hence I recommend him to your university without any reservation.

Prof. Ananya Dasgupta
