

Letter Of Recommendation

I am writing this letter of recommendation for Mr. Karan Choudhary, who is acquainted with me since (mention year) in my position of (mention designation). I have taught him the subjects of Circuit Theory and Design of Electrical Machines and recognize him as an academically brilliant student with an ambitious attitude, and a mature thought process.

He possesses strong fundamental knowledge, is inquisitive about technology, and does not mind exploring beyond the prescribed curriculum to know the latest technical advent. His attentive conduct in the lectures depicts his eagerness to acquire deep domain knowledge and the same can be gauged from the genuine queries that he raises frequently. He listens to the explanation given with patience and taking feedback constructively attempts to make these discussions as constructive as possible. In his interactions with others individually or as part of the group he communicates politely and works well as a team player. He always takes out time to help his peers facing issues and due to his helpful nature has managed to develop a reputation of being a friendly team member who remains amicable towards all his colleagues.

I have also instructed him in the lab sessions conducted for the subjects of Electronic Devices Circuits and Electric Machines. His enthusiastic participation in these sessions was perfectly in sync with the curious persona he exhibits in the theory classes. During these sessions, I often noticed him documenting the insights he drew from a particular experiment and he did not mind sharing this knowledge with his teammates. Additionally, his lab work was an indication of his sound technical skills and I particularly admire his strong knowledge of practical aspects of the concepts being discussed in the lab. On a personal level, Karan is a vivacious person with visible enthusiasm for extracurricular activities and participated in various such activities. He has a special interest in technical events and was part of many intra-college symposiums. Taking the initiative to organize some of them as well, he even set up the department's symposium and played a pivotal role in arranging this event.

In my opinion, this course will not only allow Karan to proliferate his knowledge but also will facilitate him towards gaining essential skills that hold key to an enriching career in the field of (mention stream). Further, a curriculum designed under global standards will enhance his understanding of modern techniques and managerial skills. I, therefore, strongly recommend him to the institution.

Mrs. Amrita Singh
