

Letter Of Recommendation

I am writing in support of Mr. Rohan Khanna's decision to attend the (course name). I have known him since (mention year) and instructed him in the subjects of Analysis and Design of Algorithms, and Software Engineering. Based on my observation, I would say that he is an avid learner who is excellent in academics and is supportive of his colleagues.

Academically he has been brilliant in his performance and the merits of his temperament and discipline are reflected in consistently good scores and he has secured in all these years. Despite his sound conceptual knowledge and strong know-how on advanced technologies, he remains humble and interacts politely with others. Often being able to finish his work before the deadline given, he is willing to explore additional responsibilities and never mind helping his colleagues by sharing their workloads. His innate quality of being helpful is widely admired by all his colleagues and due to his empathetic conduct; he is held in high regard by his peers and juniors alike.

I have mentored him on two projects named "Smart City Traveller" and "IntelliRoute" both of which were aimed at enhancing user experience by leveraging the latest technologies such as Artificial Intelligence and Cloud Connectivity. During these projects, I was pleased to witness his exceptional learning abilities and was amazed at his comprehensive understanding of multiple tools and techniques being used in various tasks. In particular, he stood out in terms of his panache for attaining efficiency, achieving scalable and pragmatic solutions, and not to forget, his leadership skills leveraging which he was always able to bring out the best in his team members. Given the favorable results he has delivered when entrusted with crucial tasks and witnessing his sound leadership capabilities, I think that he is capable of leading by example, and is on his way to donning the top roles in time to come.

Even a student, he is a firm believer in achieving holistic growth, consciously takes out time for extra-curricular activities, and participates in an array of events ranging from technical to sporting activities.

I feel Rohan is a meticulous and motivated individual with a desire to learn and, is a perfect fit for this course offering a wider scope to study and explore more practical-oriented subjects. The coursework would be beneficial to his professional development, and therefore, I endorse his application without any reservation.

Prof. Aditya Joshi
Assistant Professor
