

Letter Of Recommendation

It is with immense happiness that I am writing this letter recommending my student Mr. Vikram Iyer. He is known to me through our academic interactions at (mention institute name), where I have taught him the subjects of Java, Compiler Design, and Theory of Computation. Having mentored him, I would say he is an assiduous individual, exhibits the rare trait of a true team player, and at all times strives to optimize the overall team performance.

He likes to update himself on current technical disruptions shaping up the technical arena and explores beyond the prescribed curriculum to proactively learn a new topic. His positive attitude towards academics is infectious, inspires people around him, and contributes to developing a positive environment for learning and intellectual discussions in the class. He is equally determined to deliver excellent performance on any assigned task and completes his duties with precision. The dedication he displays is remarkable and I feel it comes from his innate quality of feeling responsible for performing all his duties carefully. Irrespective of the magnitude of the problem faced, he adapts well to the situation, utilizes his vast knowledge to come up with an apt solution, and consequently is the go-to person for the team in crunch situations.

Particularly noteworthy are his efforts to be a part of several extra-curricular and co-curricular activities without his studies getting impacted. His commitment to these activities is as high as it is for his academics as he attentively attends various college events with a tremendous amount of energy and zeal. So far he has completed various certifications, including Red hat certifications for cyber security (RHCSA – Red Hat Certified Security Agent and RHCSE- Red Hat Certified System Engineer), and owing to his desire for continuous learning is planning to pursue more courses in the future. Moreover, he has participated in an inter-college RHCSA Kahoot competition and made the college proud by securing the first prize.

In my opinion, the course will provide him a better exposure to the core subjects and hence would allow him to refine his domain knowledge. It will further enhance his efficiencies in his chosen field and help him emerge successful in his professional endeavors. With his excellent traits, I am convinced that he will prove to be an asset to your university, and therefore highly recommend his application for the program that he intends to take up. Please provide his application with your consideration.

Prof. Aarush Bajaj
Assistant Professor
