

Letter Of Recommendation

This is to recommend Mr. Sameer Choudhary who is applying for a Master's program at your esteemed University. I have known him since (mention year) and in my interactions with him over time, he came across as an assiduous and multi-tasking individual with ability to work collaboratively with others.

He enjoys exploring new things, keeps himself abreast with the latest technological trends and often leverages his acquired knowledge in developing efficient products. His knack for ensuring compliance is incredible as he strives to understand the relevant policies in detail and has taken up various data protection courses and tests such as European Union's GDPR regulation awareness test and HIPAA awareness quiz. Being an inquisitive person, from the onset of his stint he showed curiosity towards the systems and processes being followed in the organization and diligently adhering to the guidelines adapted to work culture with ease. A firm believer in team work, he is willing to pitch in beyond his assigned responsibilities and volunteered for new features testing at the time of release. Endorsing team spirit, he also assisted other teams and due to his helpful nature enjoys a good opinion from his colleagues across the organization.

Sameer was under my mentorship on projects related to designing a reporting tool to summarize, data with dynamic filters (tabular view) and building a feature that allows user to export data using ABC Company. In both these projects, handling multiple tasks, he aimed to achieve highest level of quality, consistently introduced stable features without any major bug and followed a clean code regime. Additionally, he emphasized on making the code modular and reusable, a practice that came handy when one of our On-Premise Enterprise users requested us to support a separate criteria for export schedules. Considering the fact that it was a new vertical and it would've taken at least two month to release the feature, the reusable code that he developed acted as a catalyst and the new feature was added within a month. In the context of his overall performance, I feel the aforementioned instance is an apt example of how his professional approach and broader vision of embracing existing best practices provides his team an added advantage, especially in demanding situations requiring lot of investment in terms of time and effort.

I think he would gain more relevant skills through this course and eventually realize his career aspiration of becoming an expert level professional in the area of his interest. Hence, I affirm my recommendation for him.
