

Letter Of Recommendation

I am pleased to support Mr. Arnav Patel's decision to attend (University name) for the (course name). I have known him since (mention year) and instructed him in the subjects of Object-Oriented Programming, and Design and Analysis of Algorithms. Based on my observation, I would say that he is an avid learner who possesses a striking academic record and is meticulous and sincere.

Academically he has been brilliant in his performance and the merits of his temperament and discipline are reflected in consistently good scores he has secured throughout the course. Besides his strong academic profile, he demonstrated a strong desire to explore and integrate insights from his learning in a multidisciplinary manner. Having completed various projects and developed applications using C++ and Python, a shift in his interest towards Software Engineering occurred in the third year and the subject was his preferred theme in all his major projects thereafter including his final year project. Complementing his interest in the subject perfectly was an undeterred focus he exhibited in enhancing his practical skills and in his quest for attaining comprehensive knowledge, was always eager to participate in various workshops and lab sessions.

I have mentored him on projects aimed at developing a desktop notification application and a wireless attendance system using AWS cloud, Python, and algorithms. In these projects, I was pleased to witness his exceptional learning abilities, and as a student his detailed understanding of multiple tools and techniques, in particular, was admirable. Furthermore, he impressed me with his panache for attaining efficiency, achieving scalable yet pragmatic solutions, and not to forget, his leadership skills utilizing which he was always able to bring out the best in his team members. Despite his hectic involvement in academic projects, he always took out time for extra-curricular activities and participated in varied technical events ranging from coding competitions organized by the college to the national level hackathon (Smart India Hackathon 2017).

Additionally, he has represented the college in INNO-TECH 2018, wherein he presented an android application and following his interest in technology consulting attended a mentorship drill in Consulting & Leadership conducted at SAP Labs. Moreover, he has served as the Treasurer of IEEE (student body of RNSIT) in the academic year 2012-13 and in his role of core committee member also assisted in organizing technical festivals, workshops, and JAM sessions.

To conclude, I think Arnav is equipped with the requisite skills for this course and it will further add another dimension to his professional career. I, therefore, recommend his application wholeheartedly.
