

Letter Of Recommendation

I am delighted to pen this letter recommending Mr. Vihaan Thakur whom I have known since his internship at ABC Company. Through my interactions with him in my capacity of reporting manager, I found him to be a diligent person with tremendous passion towards acquiring broad technical knowledge and learning novel concepts.

Although it was one of his maiden exposures of working in a professional setup, he displayed an unmatched exuberance for completing his assigned tasks, implemented all the aspects of an assignment sincerely, and was incredibly focused about achieving set goals. With his ability to accept constructive criticism, he was flexible in accommodating changes and always took into consideration the dynamic nature of project requirements. He adapted to the work culture with ease, showed curiosity towards the systems and processes being followed in the organization, and adhered to the guidelines given to him. Moreover, he also showed his adeptness at organizational skills, especially handling multiple tasks simultaneously, and I believe his caring nature allowed him to maintain a cordial work relationship with others.

Under my supervision, he has worked on the major project titled "MATUSR" wherein his responsibility included testing the new feature and assisting me in creating the user subroutine for it. This subroutine then would subsequently work as a template for the user to create different structural materials. During the project, he also documented the testing of new features and worked on the open issues related to model files of verification, tutorials, and examples. As these models and related documentation were expected to serve as a guideline for the user, this was a crucial aspect of the assignment. Understanding the importance of his role and its impact on the overall quality of the deliverable, he meticulously performed all his duties and was thorough in reviewing his submissions to ensure accuracy.

On this project, he was eager to take up extra responsibilities, was open to learn from his work, and perfectly augmented it with his persistent efforts. When faced with a problem, he was quick in identifying right techniques to resolve it, and I was particularly impressed with his development in regards to presentation of findings in a coherent manner and efficient management of allocated time. Not just work commitments, he was heavily involved in various employee engagement activities and training and development initiatives, and so far has completed four levels of Cyber security awareness training program.

I feel this course will assist Vihaan in acquiring advanced level learning, strengthen his skill-set to make him industry ready, and enhance his career prospects as an engineer. I therefore recommend him to your university without any reservation.
